Monroe Downtown Development Authority
120 E. First Street
Monroe, MI 48161

Dear Monroe Downtown Development Authority Board:

On behalf of Place & Main Advisors, LLC, I am pleased to present you with this Strategic Plan for the Monroe Downtown Development Authority. This strategic plan is the result of numerous hours this board has put forth to develop this document with input from City staff.

This Strategic Plan results in updated Mission and Vision statements for the DDA as well as identifies a series of ongoing, near, mid and long-term projects. While this plan has ongoing and long term projects identified, it is specifically designed to focus on projects to be implemented in a shorter time frame and within the capacity the DDA has. In the end, we are confident in the Strategic Plan we have put forth and your ability to execute it.

Thank you for the opportunity for our firm to work with you. We have truly enjoyed our time with the Monroe DDA and have high expectations for its future.

Sincerely,

Joe Borgstrom, Principal

Organizational Statements

Organizational Statements

MISSION STATEMENT:

The Monroe Downtown Development Authority (DDA) exists to serve as the lead organization in the preservation and enhancement of downtown Monroe. Its mission is to provide direction and resources to businesses, property owners and residents in the downtown district. It works for the advancement of downtown through promotion of its businesses and events; the facilitation of redevelopment opportunities; and to increase Monroe's unique sense of place and community. Its goal is to be a dynamic and innovative organization that works with volunteers, other organizations and the City of Monroe for the betterment of downtown.

VISION STATEMENT:

In 2027, downtown Monroe will be a state- and nationally-recognized vibrant and walkable downtown. The storefronts and upper floors are occupied and attract residents to shop and dine locally. It is the preferred downtown in the region for young and successful professionals and retired baby boomers to reside.

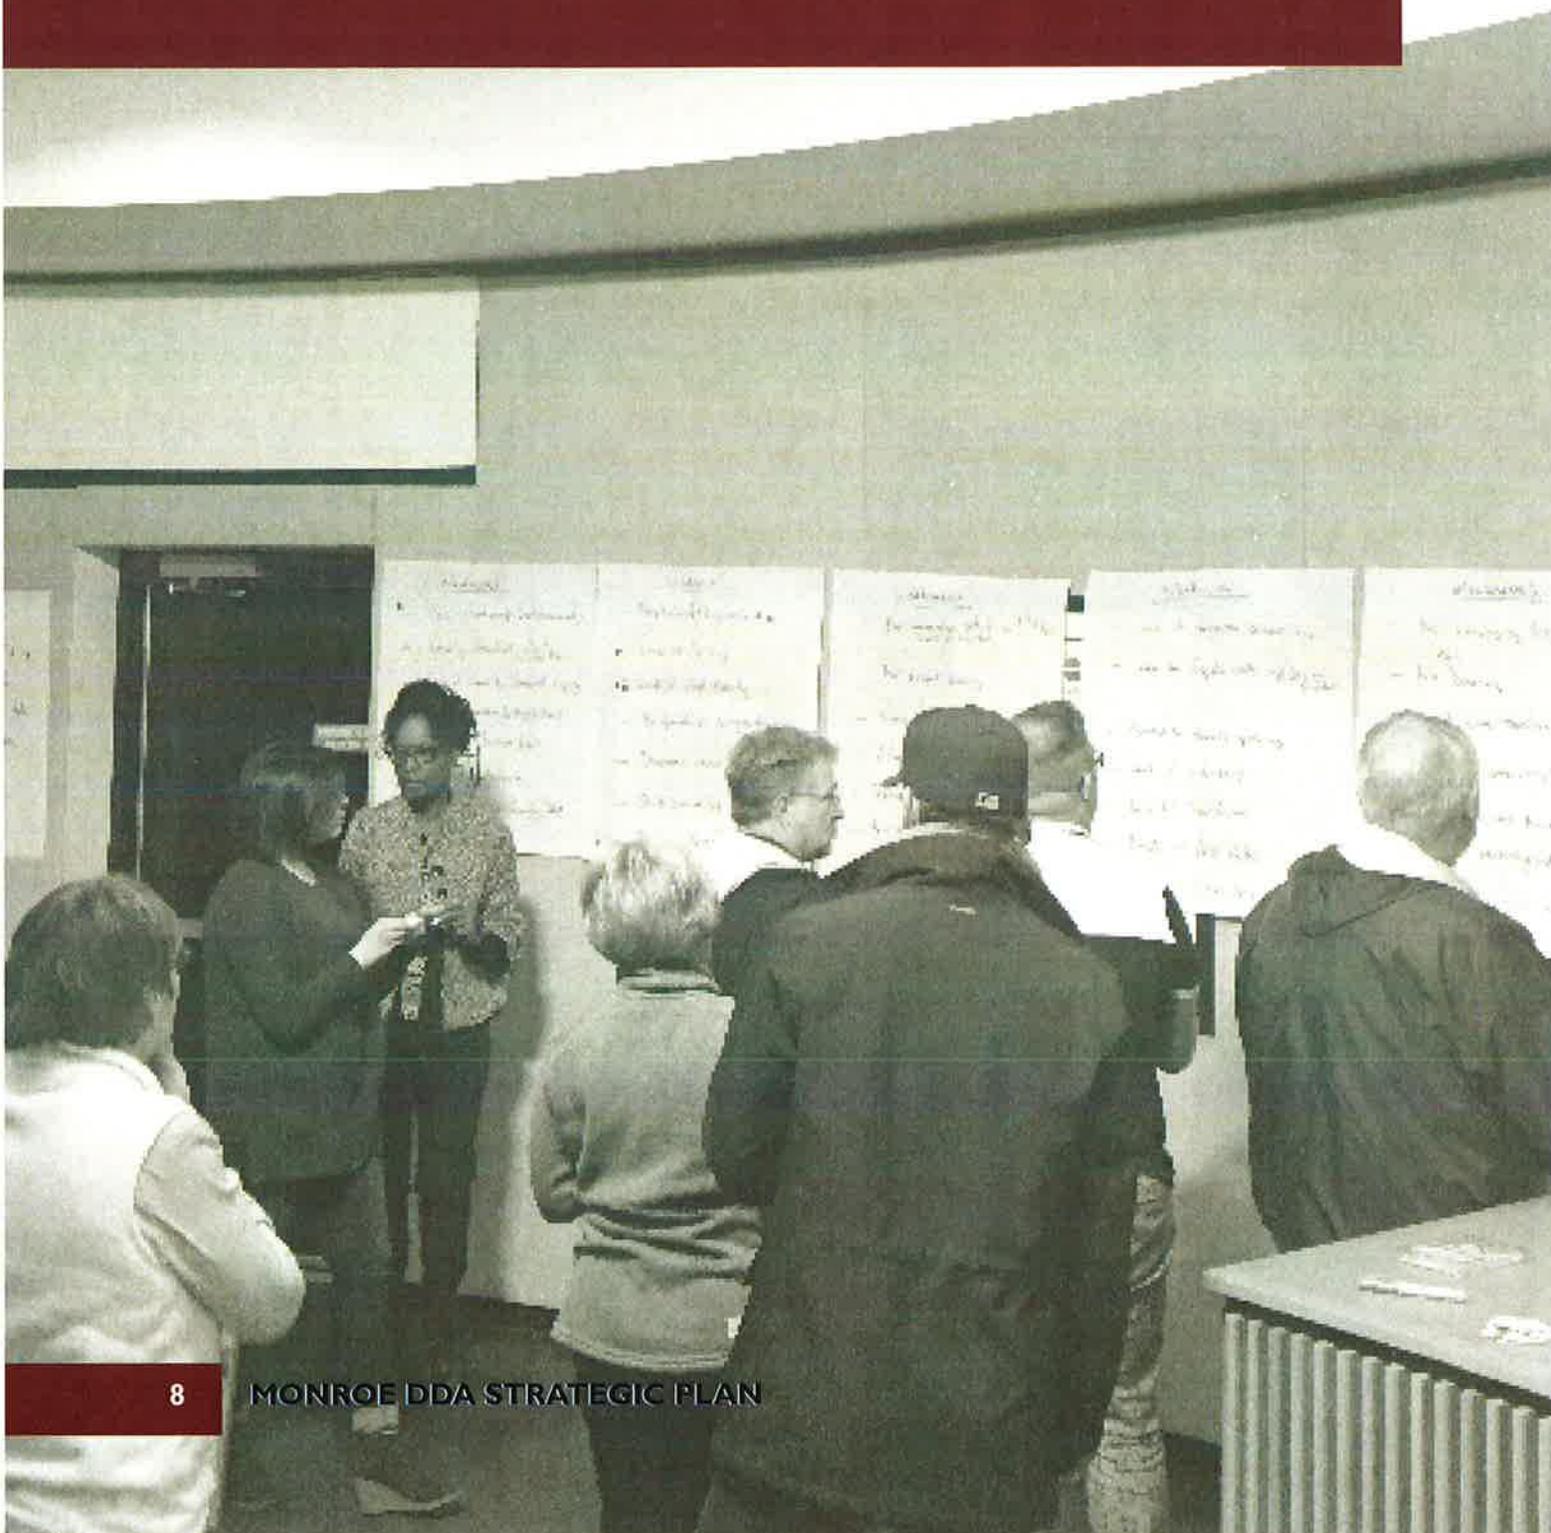

The downtown Monroe retailers and restaurants combine into a lively shopping and entertainment district with an active nightlife. They leverage technology to augment their storefront sales online and to promote their businesses to the community and others in the region.

All historic downtown buildings have made improvements from façade renovations, new signage, and outdoor seating. Empty lots and underused properties are revitalized with productive real estate contributing to the tax base, creating jobs and places to live.

The downtown is connected by an attractive, functional streetscape that is welcoming to pedestrians and non-motorized modes of transportation. The downtown has created greater connection to major employers, education institutes and other attractions in the area such as the River Raisin, National and State Parks, and the Center for the Arts.

Strategic Planning Process

Strategic Planning Process

From November of 2016 to March 2017, the Monroe Downtown Development Authority (DDA) Board held a number of special meetings for the purpose of developing this Strategic Plan. On November 15, 2016, the DDA Board conducted a facilitated exercise where a list of strengths, weaknesses, opportunities and threats were formed based on the opinions of the board. On December 6, 2016, the DDA held a similar meeting to gather public input from various stakeholders in the community. Attendees also formed a list of the various strengths, weaknesses, opportunities and threats. They were then asked to vote on the most important items in each area. More than fifty stakeholders participated in the event. The following are the areas for each listed by those items with the number of votes in parentheses ():

The image shows the interior of a cafe or bakery. In the foreground, there is a counter with a menu board. The menu board has two sections: one for 'Dulce Chat Latte' with an image of a latte, and another for 'HOT APPLE CIDER' with an image of an apple. Behind the counter, there are shelves stocked with various items, including what appears to be coffee beans and other supplies. A large, ornate pendant light hangs from the ceiling. The ceiling is a drop ceiling with a grid pattern. In the background, there is a doorway leading to another area, possibly a kitchen or storage room. The overall atmosphere is warm and inviting.

DDA & Regional Goals

DDA & Regional Goals

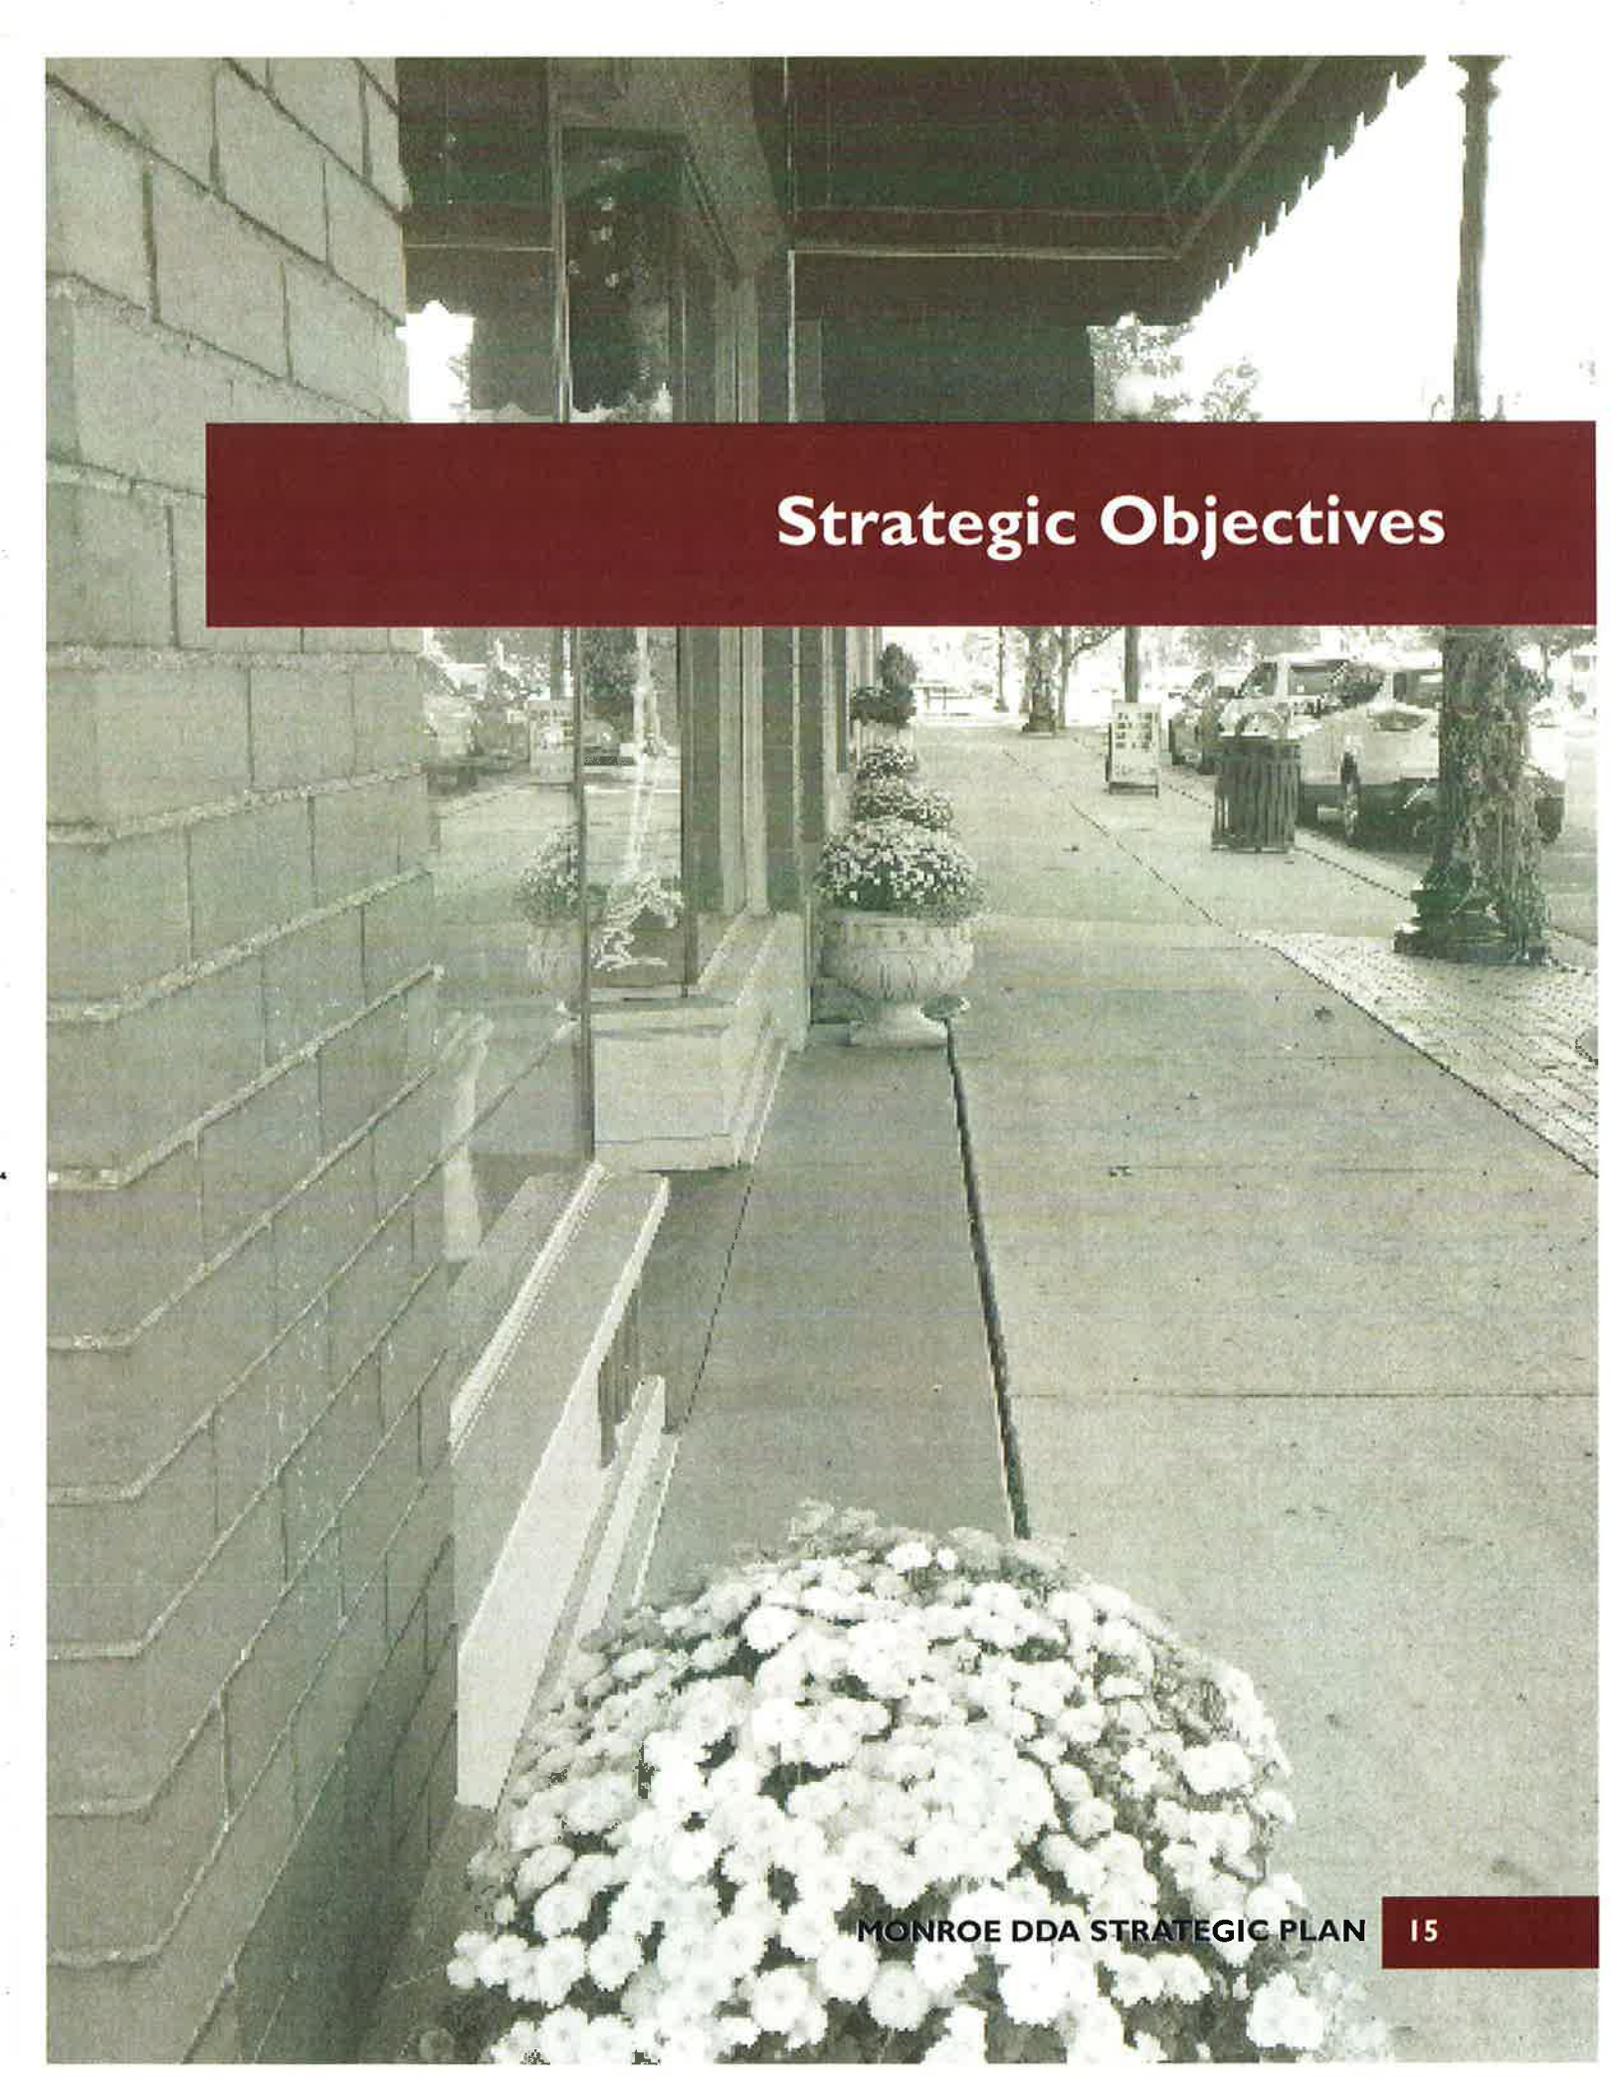

DDA GOALS:

- 1) Inform and educate building owners and public of the actions and accomplishments of the DDA and businesses
- 2) Support downtown businesses and property owners
- 3) Preserve and enhance downtown by facilitating redevelopment
- 4) Market the downtown to encourage people to frequent local businesses and events
- 5) Serve as a leader of the organizations that connect to downtown and link to other community resources
- 6) Establish an environment that promotes residential growth downtown

REGIONAL PROSPERITY GOALS:

The counties of Monroe, Hillsdale, Jackson, Lenawee, Livingston, and Washtenaw make up Prosperity Region 9. This group of counties have identified two primary goals for the region.

- 1) Growing and attracting talent to meet industry needs
- 2) Advancing a High-quality and Diverse Regional Transportation System

Strategic Objectives

Strategic Objectives

This Strategic Plan is divided into three main areas: ongoing efforts, short/mid-term objectives, and long-term objectives.

Ongoing Activities

The Monroe DDA currently either directly offers or works with the City of Monroe to provide services to the DDA district. While valuable, these activities should be slightly altered in the areas listed below.

City Services- The Monroe DDA currently undertakes several activities in conjunction with the City of Monroe. These activities include street sweeping and snow removal. These activities should continue as they are considered basic maintenance and serve to provide uniform service throughout the district.

Café Seating- While the permitting process for outdoor seating lies with the city and is allowable, the DDA should strongly encourage outdoor dining at every venue that offers food or beverages. This seating achieves two major goals: 1) From a public perspective, it creates lively street life which both attracts more people and increases safety. 2) It gives restaurants additional square footage to generate sales with little cost. If these restaurants adhere to liquor laws and local ordinances, this activity creates a win-win situation for both businesses and the public.

Banners- Banners play an often-overlooked function in communities. They serve to offer color and vibrancy as well as reinforce the branding of a downtown. As the City of Monroe rolls out their new branding (along with the DDA), this branding should be reinforced through new banners on light poles throughout the district. Furthermore, the city should revamp its existing banner policy to either remove application for a banner and make them standard on all (or every other) light pole or to allow for co-branding with the city/DDA brand on one side of the light pole and the business name (in same color scheme as the city/DDA logo) on the other.

Strategic Objectives (Cont.)

Short to Mid-Term Objectives

This objectives are designed to be implemented in a relatively short timeframe (12-24 months.) These specific tasks are also outlined in the Implementation Work Plan on page 19.

Develop a Comprehensive Communication Plan- One of the most important things an organization can do is to tell its story and the stories of those they serve. By creating a comprehensive communications plan, the DDA can, on an ongoing basis, inform the public, property and business owners of the efforts of the DDA as well as tell the good news stories of the district it serves. The communications plan should include traditional media tools such as press release and media alert templates, but also social media efforts and a schedule of planned and coordinated posts to various platforms.

Lighting and Maintenance on Riverwalk- Both the DDA and public identified the Riverwalk as an underused asset. To help activate this space for longer periods of time, the DDA should look to make the Riverwalk well-lit at night. This will increase foot traffic after dark and provide another reason for people to come downtown. Additionally, the DDA will want to make sure routine maintenance is occurring on the both the Riverwalk and private properties it abuts. Rear facades along the Riverwalk are unattractive and should be targeted for potential façade improvement grants.

Provide consultation services to building owners on converting under-used upper floors into residential or office- Numerous building owners downtown may be interested in converting unused or underused upper floors into either residential units or office space. Offering access to a development consultant could help spur needed redevelopment of these spaces. The DDA should explore securing a consultant to provide these services and assess the level of interest of building owners to use this type of service at either a discounted rate or provided for free.

Expand Façade Grant Program- The DDA should consider expanding the façade grant program to cover interior renovations or at the very least allow interior renovations to be used as match. By broadening the area the façade can cover, it could spur additional redevelopment and dramatically increase the value of properties downtown, thereby increasing tax increment financing (TIF) revenue for the DDA.

Strategic Objectives (Cont.)

Short to Mid-Term Objectives (Continued)

Retail Expansion and Recruitment- The DDA has contracted with LandUse USA to provide a retail Target Market Analysis (TMA). The results of this retail TMA should be shared with every existing business owner in the district. By informing existing businesses of opportunities first, the DDA is supporting local businesses first who could potentially expand before recruiting additional businesses from the outside. Once this data has been shared with local businesses, efforts should be made assess the desire of local businesses to expand. Once that has been determined, then efforts to recruit additional locations from other successful businesses in the region should be pursued.

Promote Residential Units Downtown- The DDA has also contracted to receive a residential TMA from LandUse USA. The results of this TMA should also be shared with property owners. This data could be followed up with the consultation services mentioned above and combined with an expanded façade grant program to create a powerful force for redeveloping properties downtown. In addition, the existing units downtown need to be inventoried and available units marketed.

Long Term Objectives

These objectives are designed with a longer time frame involved (3-5 years.) They should be look at as long term goals within a reasonable time frame for execution.

Redevelopment of Riverfront Parking Lot- The DDA should look to redevelop the parking lot adjacent to the riverfront behind Front Street, west of Monroe Street. The DDA should encourage a mixed-use building or buildings with parking integrated on the lower level, wrapped in retail. This property is a valuable resource and the need for parking downtown can be balanced with the development opportunity this could present.

Infill of Multiple Underused Parcels/Parking Lots- There are several lots currently used for parking the DDA should consider encouraging appropriate infill development on that would serve a higher and better use than parking. Increasing the density of downtown should be a major goal for the community.

Upgrading Streetscape/Multi-modal Transportation Enhancements- As appropriate, the DDA should look to enhance the existing streetscape to enhance downtown's sense of place. This includes traffic calming mechanisms along Monroe Street, added parking for bicycles, and consider protected bike lanes. These improvements should look to create a physical link to other assets in the community such as the River Raisin National and State Parks.

Organizational Considerations

Organizational Considerations

Michigan's Downtown Development Authority Act (PA 197 of 1975) allows for DDAs to do a multitude of types of projects. To achieve these projects, the Monroe DDA has implemented a series of committees, loosely based on the Main Street America™ Four-Point Approach™. These committees act as implementation groups. It is strongly recommended the DDA keep these committees or ones similar. Furthermore, these committees are made up of “doers,” people who make things happen and get things done. As the DDA moves forward, it should be using these committees as the primary source of future board members. The DDA Board needs to evolve in a way that not only morally supports professional staff, but acts as a working board and uses its considerable skill sets for the betterment of the district and the community. By using these committees as a “farm system” to recruit new board members to be appointed by the Mayor, the DDA will move from “finding a warm body to fill a seat” to a more dynamic, active board capable of augmenting the skills of a professional staff member to create greater and faster positive change.

This Monroe DDA Strategic Plan 2017-2022 was authored by Joe Borgstrom, Principal with Place & Main Advisors, LLC.

Joe Borgstrom's background includes being the leading force behind the rise of the Michigan Main Street program to a national powerhouse in the Main Street community serving more than 40 communities. The program has won an armful of national awards and, most importantly, seen public and private investment communities participating in the program top \$220 million, created more than 1,800 net new jobs, and 226 net new businesses. It is widely regarded as one of the best coordinating programs in the country. Joe is leading Place & Main Advisors' work with the ten Project Rising Tide communities in the development of their respective economic development strategies. He also serves as an instructor for the Redevelopment Ready Communities program for Best Practice 6.1 (Economic Development Strategies) and 6.2 (Branding and Marketing.) Joe created the "Development Taskline" designed to map out the development process and to connect it to the various potential state departments' resources.

Joe is respected nationally in the world of downtown redevelopment and has served in an advisory capacity to counterparts with the Main Street Iowa program and the National Main Street Center. He has been a featured keynote speaker at downtown conferences in Delaware, North Carolina, Tennessee and Wisconsin.

He also formerly oversaw project management for his agency's role in Michigan's redevelopment incentive programs (Brownfield and Community Development Block Grant) where his team helped incent projects totaling more than \$2 billion in private investment. He rounds out his twenty-year resume as a former regional chamber of commerce executive, local economic development professional, as well as a downtown development authority and nonprofit board member.
